5 years	3.85	3.99
10 years	4.38	3.13
Since inception	6.25	5.05

Some recent performance may be lower or higher. As the value of the capital and the returns change over time (notably due to currency fluctuations), the repurchase price of the shares can be higher or lower than their initial price. The performance indicated is based on the NAV (net asset value) of the share class, and is net of all charges applying to the fund but does not account for sale commissions, taxation or paying agent fees, and assumes that dividends if any are reinvested. Taking such fees or commissions into account would lower the returns. The performance of other share classes would be higher or lower based on the differences between the fees and the entry charges. In the periods where certain share classes are not subscribed or not yet created (inactive share classes), performance is calculated based on the actual performance of an active share class of the fund whose characteristics are considered by the management company as being closest to the inactive share class concerned, after adjusting it for the differences between the total expense ratios (TER), and converting any net asset value of the active share class in the currency in which the inactive share class is listed. The performance given for the inactive share class is the result of a calculation provided for information.

Please read the important information given in the additional notes at the end of this document.

\*Please refer to the prospectus of the fund and to the KIID before making any final investment decisions.

### MANAGEMENT

Management Company  
NATIXIS INVESTMENT MANAGERS S.A.

Investment Manager  
LOOMIS SAYLES & COMPANY LP

Loomis Sayles & Company has served the needs of institutional and individual investors for more than 80 years. As an actively managed, multi-style investment manager, the firm offers both traditional and highly specialized asset classes. Employing an opportunistic approach, balanced with disciplined, bottom-up research and quantitative risk analysis, the investment teams strive to produce above-average returns across asset classes and categories.

Headquarters Boston  
Founded 1926

Assets Under Management (Billion) U.S \$363.1/ €319.3 (31/12/2021)

E-mail ClientServicing\_Requirements@natixis.com

### Calculation of performance during periods of share class inactivity (if applicable)

For periods when certain share classes were unsubscribed or not yet created (the "inactive share classes"), performance is imputed using the actual performance of the fund's active share class which has been determined by the management company as having the closest characteristics to such inactive share class and adjusting it based on the difference in TERs and, where applicable, converting the net asset value of the active share class into the currency of quotation of the inactive share class. The quoted performance for such inactive share class is the result of an indicative calculation.

### Illustrative Growth of 10,000

The graph compares the growth of 10,000 in a fund with that of an index. The total returns are not adjusted to reflect sales charges or the effects of taxation, but are adjusted to reflect actual ongoing fund expenses, and assume reinvestment of dividends and capital gains. If adjusted, sales charges would reduce the performance quoted. The index is an unmanaged portfolio of specified securities and cannot be invested in directly. The index does not reflect any initial or ongoing expenses. A fund's portfolio may differ significantly from the securities in the index. The index is chosen by the fund manager.

### Risk Measures

The Risk & Reward Profile includes a "synthetic risk and reward indicator" (SRRI), as defined by the European Securities and Markets Authority (ESMA). This risk measure is calculated based on volatility of returns, in other words fluctuations in the net asset value (NAV) of the fund. The indicator is presented on a numerical scale of 1 to 7, where 1 is low and 7 high.

The risk measures below are calculated for funds with at least a three-year history.

Alpha measures the difference between a fund's actual returns and its expected performance, given its level of risk (as measured by beta). Alpha is often seen as a measure of the value added or subtracted by a portfolio manager.

Beta is a measure of a fund's sensitivity to market movements. A portfolio with a beta greater than 1 is more volatile than the market, and a portfolio with a beta less than 1 is less volatile than the market.

R-squared reflects the percentage of a fund's movements that are explained by movements in its benchmark index, showing the degree of correlation between the fund and the benchmark. This figure is also helpful in assessing how likely it is that alpha and beta are statistically significant.

The Sharpe ratio uses standard deviation and excess return to determine reward per unit of risk.

Standard deviation is a statistical measure of the volatility of the fund's returns.

Tracking Error is reported as a standard deviation percentage difference between the performance of the portfolio and the performance of the reference index. The lower the Tracking Error, the more the fund performance resembles to the performance of its reference index.

The Information Ratio is the difference between the fund's average annualized performance and the reference index divided by the standard deviation of the Tracking Error. The information ratio measures the portfolio manager's ability to generate excess returns relative to the reference index.

### Morningstar Rating and Category

© 2022 Morningstar. All Rights Reserved. The information, data, analyses and opinions ("Information") contained herein (1) include Morningstar's confidential and proprietary information (2) may not be copied or redistributed, (3) do not constitute investment advice (4) are provided solely for informational purposes (5) are not warranted to be complete, accurate or timely and (6) are drawn from fund data published on various dates. The information is provided to you at your own risk. Morningstar is not responsible for any trading decisions, damages or other losses related to the Information or its use. Please verify all of the Information before using it and don't make any investment decision except upon the advice of a professional financial adviser. Past performance is no guarantee of future results. The value and income derived from investments can go up or down. The Morningstar rating applies to funds having at least 3 years of history. It takes into account subscription fee, the yield without risk and the standard deviation to calculate for every fund its ratio MRAR (Morningstar Risk Adjust Return). Funds are then classified in decreasing order by MRAR: first 10 per cent receive 5 stars, the following 22.5% 4 stars, the following 35% 3 stars, following 22.5% 2 stars, the last 10% receive 1 star. Funds are classified within 180 European categories.

### Reference Index

For indicative purposes only, the Fund's performance may be compared to the Reference Index. The Fund is unconstrained by the index and may therefore significantly deviate from it.

### Asset allocation

Cash offset for Derivatives represents the amount of cash the portfolio manager should borrow if he's Long exposed via derivatives and vice versa. The weighting of the portfolio in various asset classes, including "Other," is shown in this table. "Other" includes security types that are not neatly classified in the other asset classes, such as convertible bonds and preferred stocks. In the table, allocation to the classes is shown for long positions, short positions, and net (long positions net of short) positions. These statistics summarize what the managers are buying and how they are positioning the portfolio. When short positions are captured in these portfolio statistics, investors get a more robust description of the funds' exposure and risk.

### Fund Charges

The ongoing charges figure is based on expenses for the year ending December 2020. It excludes the portfolio transaction costs, except in the case of an entry/exit charge paid by the SICAV when buying or selling units in another collective investment undertaking. CDSC (if applicable): Investors in class C Shares who redeem some or all of their Shares within one year from the date of their subscription may however be levied a contingent deferred sales charge ("CDSC") that will be retained by the financial institution through which the subscription of Shares was made by deduction from the redemption proceeds paid to the relevant investor. Investors in class CW Shares who redeem some or all of their Shares within the first 3 years from the date of their subscription may however be subject to a contingent deferred sales charge ("CDSC") that will be retained by the financial institution through which the subscription of Shares was made by deducting such charge from the redemption proceeds paid to the relevant investor.

### Equity Portfolio Statistics (if applicable)

The referenced data elements below are a weighted average of the long equity holdings in the portfolio. The Price/Earnings ratio is a weighted average of the price/earnings ratios of the stocks in the underlying fund's portfolio. The P/E ratio of a stock is calculated by dividing the current price of the stock by its trailing 12-months' earnings per share. The Price/Cash Flow ratio is a weighted average of the price/cash-flow ratios of the stocks in a fund's portfolio. Price/ cashflow shows the ability of a business to generate cash and acts as a gauge of liquidity and solvency. The Price/Book ratio is a weighted average of the price/book ratios of all the stocks in the underlying fund's portfolio. The P/B ratio of a company is calculated by dividing the market price of its stock by the company's per-share book value. Stocks with negative book values are excluded from this calculation. Dividend Yield is the rate of return on an investment expressed as a percent. Yield is calculated by dividing the amount you receive annually in dividends or interest by the amount you spent to buy the investment.

### Fixed-Income Portfolio Statistics (if applicable)

The referenced data elements below are a weighted average of the long fixed income holdings in the portfolio. Duration measures the sensitivity of a fixed income security's price to changes in interest rates. Average maturity is a weighted average of all the maturities of the bonds in a portfolio, computed by weighting each maturity date by the market value of the security. Modified Duration is inversely related to percentage change in price on an average for a specific change in yield. The average coupon corresponds to the individual coupon of each bond in the portfolio, weighted by the nominal amount of these very same securities. The average coupon is calculated only on fixed rate bonds. The Yield to maturity (YTM) reflects the total return of a bond, if the bond is held until maturity, considering all the payments are reinvested at the same rate. This indicator can be calculated at the portfolio level, by weighting the individual YTM by the market value of each bond.

### Special Risk Considerations

**Changing Interest rate:** The value of fixed income securities held by a fund will rise or fall inversely with changes in interest rates. When interest rates decline, the market value of fixed income securities tends to increase. Interest rates typically vary from one country to the next for reasons including rapid fluctuations of a country's money supply, changes in demand by businesses and consumers to borrow money, and actual or anticipated changes in the rate of inflation.

**Credit risk:** (the risk of the fund's net asset value falling due to an increase in the yield spreads of private issues in the portfolio, or even a default on an issue), as certain alternative management strategies (interest rate arbitrage, distressed securities, convertible arbitrage and global macro in particular) may be exposed to credit. Increases in the yield spreads of private issues in the portfolio, or even a default on an issue, may cause the fund's net asset value to fall.

**Geographic concentration risk:** Funds that concentrate investments in certain geographic regions may suffer losses, particularly when the economies of those regions experience difficulties or when investing in those regions become less attractive. Moreover, the markets in which the funds' invest may be significantly affected by adverse political, economic or regulatory developments.

**Sustainability risk:** The Fund is subject to sustainability risks as defined in the Regulation 2019/2088 (article 2(22)) by environmental, social or governance event or condition that, if it occurs, could cause an actual or a potential material negative impact on the value of the investment. More information on the framework related to the incorporation of sustainability risks can be found on the website of the Management Company and the Delegated Investment Manager.

The fund is a sub-fund of Natixis International Funds (Dublin) I which is organized as an investment company with variable capital under the laws of Ireland and is authorized by the financial regulator (Central Bank of Ireland) as a UCITS.

Natixis Investment Managers S.A., a Luxembourg management company authorized by the CSSF, is a Société anonyme with capital of 14 000 000 euros - 2, rue Jean Monnet L-2180 Luxembourg - RCS Luxembourg B 115843.

Loomis, Sayles & Company, L.P., a subsidiary of Natixis Investment Managers S.A., is an investment adviser registered with the U.S. Securities and Exchange Commission (IARD No. 105377) and is authorized to provide investment management services in the United States. The company conducts all investment management services in and from the United States.

Distribution of this document may be restricted in certain countries. The fund is not authorized for sale in all jurisdictions and its offering and sale may be limited by the local regulator to certain types of investors. Natixis Investment Managers S.A. or its affiliates may receive or pay fees or rebates in relation to the fund. The tax treatment relating to the holding, acquisition or disposal of shares or units in the fund depend on each investor's tax status or treatment and may be subject to change. Please ask your financial advisor if you have any questions. It is the responsibility of your financial advisor to ensure that the offering and sale of fund shares complies with the relevant national law.

**The fund may not be offered or sold in the USA, to citizens or residents of the USA, or in any other country or jurisdiction where it would be unlawful to offer or sell the fund.**

**In Colombia:** Provided by Natixis Investment Managers International Oficina de Representación (Colombia) to professional clients for informational purposes only as permitted under Decree 2555 of 2010. Any products, services or investments referred to herein are rendered exclusively outside of Colombia. This material does not constitute a public offering in Colombia and is addressed to less than 100 specifically identified investors.

**In Latin America:** Provided by Natixis Investment Managers International.

**In Chile:** Esta oferta privada se inicia el día de la fecha de la presente comunicación. La presente oferta se acoge a la Norma de Carácter General N° 336 de la Superintendencia de Valores y Seguros de Chile. La presente oferta versa sobre valores no inscritos en el Registro de Valores o en el Registro de Valores Extranjeros que lleva la Superintendencia de Valores y Seguros, por lo que los valores sobre los cuales ésta versa, no están sujetos a su fiscalización. Que por tratarse de valores no inscritos, no existe la obligación por parte del emisor de entregar en Chile información pública respecto de estos valores. Estos valores no podrán ser objeto de oferta pública mientras no sean inscritos en el Registro de Valores correspondiente.

**In Mexico:** Provided by Natixis IM Mexico, S. de R.L. de C.V., which is not a regulated financial entity, securities intermediary, or an investment manager in terms of the Mexican Securities Market Law (Ley del Mercado de Valores) and is not registered with the Comisión Nacional Bancaria y de Valores (CNBV) or any other Mexican authority. Any products, services or investments referred to herein that require authorization or license are rendered exclusively outside of Mexico. While shares of certain ETFs may be listed in the Sistema Internacional de Cotizaciones (SIC), such listing does not represent a public offering of securities in Mexico, and therefore the accuracy of this information has not been confirmed by the CNBV. Natixis Investment Managers is an entity organized under the laws of France and is not authorized by or registered with the CNBV or any other Mexican authority. Any reference contained herein to "Investment Managers" is made to Natixis Investment Managers and/or any of its investment management subsidiaries, which are also not authorized by or registered with the CNBV or any other Mexican authority.

**In Uruguay:** Provided by Natixis Investment Managers Uruguay S.A., a duly registered investment advisor, authorised and supervised by the Central Bank of Uruguay. Office: San Lucar 1491, Montevideo, Uruguay, CP 11500. The sale or offer of any units of a fund qualifies as a private placement pursuant to section 2 of Uruguayan law 18,627.

Natixis Investment Managers may decide to terminate its marketing arrangements for this fund in accordance with the relevant legislation.
